

DIGITAL TELECOMMUNICATIONS CORPORATION LAUNCHES MANAGED SECURITY SERVICES THROUGH PARTNERSHIP WITH MX LOGIC

Managed Email and Web Security Services Provide Customers with First Line of Defense to Prevent Threats from Entering Managed Networks

CITY, STATE —September 1, 2007— Digital Telecommunications Corporation, (DTC) a full service telecommunications equipment supplier, today announced that it has finalized a partnership with MX Logic® a leading managed security services provider. This partnership will allow DTC to provide managed email, web security and message archiving services to its customer base in California and the Southwestern United States.

DTC is adding MX Logic Email Defense Service and MX Logic Web Defense Service. These new-hosted offerings provide customers with an effective first line of defense at the network perimeter to prevent vulnerabilities and threats such as spam, worms and spyware from entering a managed network. In addition, DTC will be offering MX Logic Message Archiving to allow businesses to store, monitor and retrieve all inbound, outbound and internal emails for compliance or general storage/retrieval purposes.

"MX Logic's managed security services fit well with our current offerings and our business philosophy – provide solutions that enhance customer productivity and profitability," said Gordon Maccani, CEO of DTC. "MX Logic is an ideal business partner for us. Their simple, smart managed security services are highly effective and affordable – a perfect fit for our customer base which ranges from Small-to-Medium Sized Businesses and Enterprises."

The implementation of MX Logic products will assure a better VoIP experience for DTC customers. By thwarting spammers and spoofers, utilizing web defense to restrict surfing, and generating internet usage reports, MX Logic products keep bandwidth available for VoIP and other data applications.

"By offering managed security services we are helping solution providers break into the managed services market so that they can build recurring revenue streams and identify new product and solutions sales," said Ken Totura, vice president, channel sales, MX Logic. "Working with companies like DTC to offer smart security solutions, we are ensuring that end user customers can improve employee productivity and limit liability, while decreasing network bandwidth and IT costs."

—more—

As a result of this partnership, DTC becomes an F(X) in MX Logic's PartnerFocus Program. The PartnerFocus Program has a low barrier of entry and helps solution providers to quickly develop lucrative recurring revenue by utilizing the industry-unique Sales On Demand and Marketing On Demand programs.
